

## NEWSLETTER 4 MARCH 2016

### Full speed ahead with the planning for Sweden's largest conference for development of higher education!

We are happy to be able to present an exciting and varied program for NU2016. We expect the detailed program to be ready in April but we can already at this point inform you that the participants will be able to attend 3 panel debates, 9 round tables, 13 workshops, 72 presentation of papers, and at the Open Square there will be intensive activity through a big number of lightning talks, demonstrations, and poster presentations. You can already now take part of the comprehensive program at our website [www.nu2016.se](http://www.nu2016.se)

We want to direct a heartfelt thank you to all of you who have been reviewers and who have had the delicate task of assessing the contributions that now form the basis for the puzzle of finalizing the program. It has been important for us to balance quality and breadth. Our ambition has been to offer a varied content which spans all themes and at the same time a program that is well-arranged and coherent for our participants.

Registration is made on our website under [registrering](#). Here you also have the possibility to book accommodation at the conference hotel or at a hotel nearby. Remember that 15 March is the last date for Early Bird.

**Conference dinner will be on 16 June at the multi-cultural Moriskan, in Malmö Folkets Park!**

### Exhibition!

The conference exhibition is being filled with companies and organizations continuously. On site during the three conference days there will be, for example, suppliers of learning platforms, tools for digital examination, plagiarism controls and higher education institution aps. There are still some places available. If you are interested, please contact Christina Hansson, [christina.hansson@bth.se](mailto:christina.hansson@bth.se)

### Reminder of important dates!

Early Bird	15 Mar 2016
Last registration date	15 May 2016

### NU2016 aims at sustainability!

As a participant you can help us to aim at sustainability by bringing your own conference bag, paper and pen as we will not give out this material in order to reduce material consumption. You can read more about our sustainability ideas at [www.nu2016.se](http://www.nu2016.se)
